**FOR IMMEDIATE RELEASE
DECEMBER 17, 2022**

UPDATED ROAD CLOSURE MAP FOR WHSSSP PHASE 5

MUSCATINE, Iowa – An updated Road Closure diagram has been issued for the West Hill Sanitary and Storm Sewer Separation Project Phase 5 as the project heads into the winter shutdown period.

Climer and Logan are fully open for residents and traffic.

Lucas Street is accessible from the West 8th Street up to but not through the Green Street intersection. The Main Street intersection is open to traffic.

Access to 970 Lucas is through a temporary path through the intersection from the south. The 900 block of Lucas and the Lucas/Green intersections are currently closed. However, the contractors have indicated that a temporary rock surface will be ready soon to allow access through the winter.
